SOLIDITY REVIEW

This document may contain confidential information about IT systems and the intellectual property of the Customer as well as information about potential vulnerabilities and methods of their exploitation.

The report containing confidential information can be used internally by the Customer, or it can be disclosed publicly after all vulnerabilities are fixed — upon a decision of the Customer.

Introduction

Auditorium (Consultant) was contracted by SUDO CHAIN (Customer) to conduct a Smart Contract Code Review and Security Analysis.

This report presents the findings of the security assessment of the Customer's smart contracts.

Smart Contract	**0x31cBD2123CBd141fE8270d7c91bA571E1489b4A3**	
Owner / Deployer	**https://bscscan.com/address/0x6d4f14531d347f4034a21d455640a803c0c05e18**

CHECKED ITEM

We have audited provided smart contracts for commonly known and more,specific vulnerabilities. Here are some of the items that are considered:

ITEM	TYPE	DESCRIPTION	STATUS
Default Visibility	SWC-100 SWC-108	Functions and state variables visibility should be set explicitly. Visibility levels should be specified consciously.	PASSED
Integer Overflow and Underflow	SWC-101	If unchecked math is used, all math operations should be safe from overflows and underflows.	PASSED
Outdated Compiler Version	SWC-102	It is recommended to use a recent version of the Solidity compiler.	PASSED
Floating Pragma	SWC-103	Contracts should be deployed with the same compiler version and flags that they have been tested thoroughly.	PASSED
Unchecked Call Return Value	SWC-104	The return value of a message call should be checked.	PASSED
Access Control & Authorization	SWC-105	Ownership takeover should not be possible. All crucial functions should be protected. Users could not affect data that belongs to other users.	PASSED
SELFDESTRUCT Instruction	SWC-106	The contract should not be self-destructible while it has funds belonging to users.	PASSED

AuditorBsc@gmail.com

ITEM	TYPE	DESCRIPTION	STATUS
Liquidity Lock	SWC-107	Liquidity must be locked for 1 year, making sure everything is safe to avoid scams	NOT AUDITED
Check-Effect Interaction	SWC-107	Check-Effect-Interaction pattern should be followed if the code performs ANY external call.	NOT AUDITED
Assert Violation	SWC-110	Properly functioning code should never reach a failing assert statement.	NOT AUDITED
Deprecated to Untrusted Callee	SWC-111	Contracts should be deployed with the same compiler version and flags that they have been tested thoroughly.	NOT AUDITED
Unchecked Call Return Value	SWC-112	Delegatecalls should only be allowed to trusted addresses.	NOT AUDITED
DoS (Denial of Service)	SWC-113 SWC-128	Execution of the code should never be blocked by a specific contract state unless it is required.	NOT AUDITED
Race Conditions	SWC-114	Race Conditions and Transactions Order Dependency should not be possible.	NOT AUDITED
Authorization	SWC-115	Authorization SWC-115 tx.origin should not be used for	NOT AUDITED
Block values as a proxy for time	SWC-116	Block numbers should not be used for time calculations.	NOT AUDITED
Signature Unique Id	SWC-117 SWC-121 SWC-122 EIP-155	Signed be used as a unique id. Chain identifier should always have a unique id. A transaction hash should not should always be used.	NOT AUDITED
Shadowing State Variable	SWC-119	State variables should not be shadowed.	NOT AUDITED

PROJECT OVERVIEW

SUDO CHAIN

[~] $ sudo is EVM Blockchain PoS Blockchain Faster Blockchain

SudoChain network uses the cryptocurrency “APT” for a variety of purposes. Fundamentally, it is the sole method of payment that can be used to pay transaction fees.

- **SUDO CHAIN — a simple ERC-20 token that not mints all initial supply ,to a deployer. Additional minting is not allowed. It has the following attributes:**

- NAME TOKEN : SUDO CHAIN
- TICKER : APT
- DECIMALS : 18
- TOTAL SUPPLY : 10,000,000 **APT**

Privileged roles

- Owner has 23% of the PSv2 liquidity
- set_Max_Transaction_Percent can modify max tx amount
- set_New_Router_Address has onlyOwner modifier
- set_Transfers_Without_Fees can probably change the fees
- blacklist_Remove_Wallets has onlyOwner modifier
- Owner can blacklist addresses, honeypot risk
- _set_Fees has onlyOwner modifier
- _set_Fees can probably change the fees

MEDIUM RISK

AuditorBsc@gmail.com

RECOMENDATION

CRITICAL : No critical severity issues were found.

HIGH : No high severity issues were found.

MEDIUM :

- set_Max_Transaction_Percent can modify max tx amount - Rec : **Turn Off**
- Owner can blacklist addresses, honeypot risk - Rec : **Turn Off**
- _set_Fees has onlyOwner modifier - Rec : **Turn Off**
- blacklist_Add_Wallets has onlyOwner modifier - Rec : **Turn Off**

LOW : No low severity issues were found.

Additional Report

LIQUIDITY LOCK	https://www.pinksale.finance/pinklock/record/1045943?chain=BSC https://www.pinksale.finance/pinklock/record/1046099?chain=BSC
LIQUIDITY LOCK PERCENTAGE	**28.5% on PinkLock** **46.6% on PinkLock**
TOTAL LOCK OWNER	**1 DEPLOYER ADDRESS**

DISCLAIMERS

Auditorium Disclaimer

The smart contracts given for audit have been analyzed by the best industry and issues in smart contract source code, the details of which are disclosed in this report (Source Code); the Source Code compilation, deployment, and functionality (performing the intended functions).

The audit makes no statements or warranties on the security of the code. It also cannot be considered a sufficient assessment regarding the utility and safety of the code, bug-free status, or any other contract statements. While we have done our best in conducting the analysis and producing this report, it is important to note that you should not rely on this report only — we recommend proceeding with several independent audits and a public bug bounty program to ensure the security of smart contracts.

Technical Disclaimer

Smart contracts are deployed and executed on a blockchain platform. The platform, its programming language, and other software related to the smart contract can have vulnerabilities that can lead to hacks. Thus, the audit cannot guarantee the explicit security of the audited smart contracts.
